ABSTRACT

Contents include statistical data in tabular form, with some narration, on: a two-year comparison of median undergraduate charges; a regional comparison of median undergraduate tuition and fees for 1978-79; a two-year comparison of median tuition and fees for graduate and first professional students; the median of the difference of tuition and fees over the last year; ranges of charges (institutional and regional); the long-term trend in median undergraduate charges; and highest and lowest charges, by institution. Fees (resident and nonresident tuition and fees, room, and board charges) are given for each state and land-grant university. (MSE)

INCREASE IN UNDERGRADUATE TUITION, LIVING COSTS EXCEEDS RISE IN CPI

The median tab for an undergraduate's attendance at one of the nation's major public universities for 1978-79 will be 7.8 percent higher than it was in 1977-78. This is one percent more than the 6.8 percent change in the average Consumer Price Index (CPI) from fiscal year 1977 to fiscal year 1978. The CPI averages were calculated by D. Kent Halstead, Research Economist at the National Institute of Education in Washington, D.C.

The median total charges--tuition, required fees, room and board--for a state resident attending state and land-grant universities during 1978-79 will be $2,221, as compared to $2,061 for 1977-78.

n= number of respondents. To be included in total charges, a respondent had to be a four-year, PhD-degree granting member institution that offered room and from 19 to 21 meals a week.

[1] These are the median charges for room and board at institutions charging separately for each of these services.

[2] These are the median total charges for room and board, at all institutions offering these services, whether charges are made separately or as one combined fee.

The Office of Research and Information (ORI) of the National Association of State Universities and Land-Grant Colleges (NASULGC) analyzed data on student charges from survey responses received from 222 campuses, out of a total of 249 four-year campuses in the NASULGC membership. The campus response rate for this report is 89.2 percent.

ORI received data from all but six of the Association's 140 member institutions in the 50 states, the District of Columbia, Guam, Puerto Rico and the Virgin Islands.

Respondents were asked to update their 1977-78 figures, if necessary. Therefore the 1977-78 figures in this report may vary from last year's report.

Inclusion criteria for respondents in Table 1 are (1) a four-year campus; (2) a PhD.-granting institution; and (3) a campus that offers room and from 19 to 21 meals per week.

ROOM AND BOARD COSTS ROSE MORE THAN TUITION THIS YEAR

For state residents, undergraduate tuition and fees alone were up 2.6 percent compared with last year, from a median of $690 to one of $708. For non-residents, tuition and fees jumped only 1.9 percent, from $1,701 to $1,733. Total charges for non-residents went up 5.7 percent, with median costs rising from $3,221 to $3,406.

To complete the total charges package for undergraduates, the median rate for room stood at $638, a rise of 8.1 percent over last year's median rate of $590, for the 68 campuses which provided separate information on room charges. Median board rates rose 6.8 percent at the 57 campuses which gave comparable information, rising from $747. to $798. The 1978-79 median for board (63 cases) is $803.

Combined room and board, including data for campuses which charge separately for these services and those which have one combined charge, went up a hefty 9.5 percent, from $1,402 to $1,535. One hundred and eight survey respondents provided information about room and board.

The two primary reasons cited for increases in charges were (1) inflation, mentioned by more than half of the respondents, and (2) the necessity to maintain program quality, cited by more than one-third of the reporting group. Other reasons cited included the need to raise faculty and staff salaries, the absence of alternative sources of revenue and inadequate state appropriations.

NEW ENGLAND LEADS REGIONS IN UNDERGRADUATE TUITION CHARGES

In a regional comparison of median undergraduate tuition and fees for 1978-79, member institutions in New England lead in the resident tuition category, followed by members in the Middle Atlantic, the Middle West, the Southeast and the West.

In the non-resident category, New England again leads, followed by members in the Middle West, the West, the Middle Atlantic and the Southeast.

Table 2 on the following page gives a regional comparison of median undergraduate tuition and fees for 1978-79.

MEDICAL, NON-RESIDENT LAW AND DENTISTRY SCHOOLS LEAD GRADUATE AND FIRST PROFESSIONAL TUITION INCREASES FOR 1978-79

The median tuition and fees for resident graduate students increased this year by the same percentage as that for resident undergraduates, namely 2.6 percent. Non-resident graduate students face a much steeper increase over last year, from $1,704 to $1,818 (6.7 percent), and over non-resident undergraduates, who will pay only 1.9 percent more than last year.

Increases in median tuition and fees for law, medicine, and veterinary medicine were above the percentage rises reported for undergraduates; only the percentage increase in the median dentistry school tuition and fees for residents was less than the 2.6 percent rise that undergraduates face.

All median tuition and fees charges for 1978-79 at the graduate and professional levels continued to be at least $1,000, with the exceptions of charges for resident graduate and resident law school students.

The highest percentage increases reported for 1978-79 were for all medical students and for non-resident law and dental students. Median tuition and fees for non-resident law students rose from $1,871 to $2,041; for non-resident medical students, from $3,510 to $3,759; for resident medical students, from $1,458 to $1,566; and for non-resident dental students, from $3,070 to $3,288.

Table 3 on the following page gives complete information on median charges for graduate and professional schools for 1977-78 and 1978-79, and the amount and percentage of change.

VETERINARY MEDICINE LEADS MEDIAN OF TUITION DIFFERENCES OVER LAST YEAR

Of those respondents that raised tuition and required fees, the highest median increment was at schools and colleges of veterinary medicine. The median of the difference in tuition and fees at those colleges of veterinary medicine that changed charges this year is $116.50 for residents and $276 for non-residents.

Of those respondents that raised tuition and required fees for resident undergraduates, the median of the differences over last year is $13.50. For non-resident undergraduates, the median of the difference is $21.50.

Table 4 shows the median of the differences of tuition and required fees at those four-year, PhD.-granting responding member campuses that changed student charges for 1978-79.

TWENTY-FOUR CAMPUSES HOLD LINE ON ALL UNDERGRADUATE COSTS: ONE-THIRD FEWER THAN LAST YEAR

Twenty-four campuses are holding the line completely on all undergraduate fees for 1978-79--tuition and required fees, room and board, for resident and non-resident students. (In 1977-78, there were 32 such campuses, and in 1976-77 there were only 15.)

The 24 campuses are:

*University of Alabama in Birmingham
Delaware State College
University of Florida
Georgia Institute of Technology
+University of Guam
Alcorn State University
State Univ. of NY, Albany
State Univ. of NY, Binghamton
+State Univ. of NY, Downstate Medical

*No room and board
+No board

Looking at each category separately, the number of campuses that reported increases approximates two-thirds of the respondents, with the exception of combined room and board charges. Of the 142 campuses included in Table 1, in the undergraduate tuition and fees category, 91 raised charges for state residents and 90 campuses raised the amounts charged non-residents. Separate room charges, reported by 68 respondents, were increased on 45 of the campuses. Thirty-five of the 57 campuses which reported separate board charges listed increases. Of the 45 campuses with a combined charge for room and board, 41 showed increases.

The following 51 campuses did not increase resident undergraduate tuition and fees:

University of Alabama, University
University of Alabama, Birmingham
University of Arkansas, Fayetteville
University of Arkansas, Medical Center
University of Arkansas, Pine Bluff

Among graduate and professional schools, the highest percentages of tuition changes were reported by veterinary medicine schools, with 18 out of 21 raising resident charges and 12 raising charges for non-residents. Approximately 70 percent of the 55 law schools reported increases in their charges for both residents and non-residents. About two-thirds of the 58 medical schools raised charges (38 for resident and 35 for non-resident), and approximately the same percentage of dental schools reported increases.

PUBLIC HIGHER EDUCATION PRICE TAGS VARY WIDELY FROM CAMPUS TO CAMPUS

The amount paid for total charges and for tuition and fees alone by undergraduate students who attend state and land-grant universities varies widely. At the top of the scale in tuition charges for state residents were the Association's two private members--Massachusetts Institute of Technology and Cornell University--and one member--Temple University--which receives some state funds but not as much as other state universities.

The highest charge of $4,700 for tuition and fees, reported by the Massachusetts Institute of Technology, was well above the $2,025 reported for the statutory colleges of Cornell University, which ranked second. Since MIT is the only survey respondent which receives no state appropriations, it is atypical and is not included in Tables 9 and 10.

There were 15 campuses with charges more than $1,000 for undergraduate tuition and fees, compared with 12 last year. At the bottom of the scale, only 11 had charges below $400, compared with 12 last year. As in past years, the majority of the 1978-79 charges were in the $400-$799 range. Eighty-seven of the 142 survey respondents included in the median comparison charged undergraduates within that range. Eighteen campuses charged from $800 to $899, and 11 campuses charged from $900 to $999.

There was a much wider spread in undergraduate tuition and fees for non-residents. Seventy-seven of the 142 campuses reported charges between $1,000 and $1,999, and 28 of these reported charges between $1,300 and $1,499.

Only four campuses charged less than $1,000 in tuition and fees to undergraduate non-residents, compared to five last year. Seven charged $3,000 and above, compared to five last year. The remaining 54 campuses charged from $2,000 to $2,999 and were scattered widely within that range.

Table 5 summarizes the range of charges for undergraduate tuition and fees, both resident and non-resident, for 1978-79.

Total resident undergraduate charges, which were calculated only for those campuses which offer tuition and fees and charged both room and board, spanned a range of almost $2,740 from highest to lowest.

The lowest resident undergraduate total charge was $1,370, the amount reported for freshmen and sophomores by the University of Puerto Rico, Rio Piedras. Juniors and seniors pay $1,400. The highest total charge reported, with the exception of the three universities named on page 6, paragraph 3, was $3,186, the amount required for a year of undergraduate study at the University of Vermont, Burlington.

Thirty-four of the 108 campuses that provided comparable information charged under $2,000 per year for tuition, required fees, room and board. Forty-eight campuses charged from $2,000 to $2,499; of that number, 30 charged from $2,200 to $2,499. The remaining 27 campuses charged above $2,500.

Total charges for non-resident undergraduates followed the widely scattered pattern of tuition charges for out-of-state students. A high of $5,621 was reported by the University of Vermont, Burlington and a low of $1,940 was reported by Alabama A & M University. Only one campus reported total charges for non-residents of less than $2,000 (compared to three last year), while 31 had charges above $4,000 (compared to 20 last year). Charges for the remaining group of 76 campuses were distributed between $2,000 and $3,999, with 10 campuses reporting charges between $3,000 and $3,099.

Table 6 summarizes the ranges of total charges for resident and non-resident undergraduate students for 1978-79.

HIGHEST, LOWEST COSTS BY CAMPUS FOLLOW USUAL REGIONAL PATTERNS

Rankings of the ten campuses of state and land-grant universities with the highest and lowest charges for tuition and required fees for undergraduates followed traditional regional patterns. Campuses located outside the continental United States and in Texas dominated the list of lowest charges for undergraduate resident students. Campuses in New England, New York, Pennsylvania, Michigan and Colorado dominate the list of campuses with the highest tuition and fees for undergraduate resident students.

For non-resident undergraduates, the list of campuses with the lowest charges for tuition and fees includes four historically black campuses, two campuses outside the continental United States, and four campuses in Southern states. Eight of the campuses with the highest charges for resident undergraduates also have the highest charges for non-resident undergraduates. The University of Wisconsin at Madison and the University of Wisconsin, Milwaukee completed the list.

As for total charges for resident undergraduates, the campuses with the lowest include five historically black institutions, two Texas institutions, two institutions outside the continental United States, and one in Arkansas. Six of the ten campuses with the highest charges for undergraduate tuition and fees are also on the list of total highest undergraduate charges. Of the remaining four, two are in the same geographical regions and two are in Ohio.

For non-resident undergraduates, eight of these ten campuses with the lowest charges are the same as those with the lowest tuition and fees. Of the other two, one is also in Arkansas and the other is in Louisiana.

For non-resident undergraduates, the list of the ten campuses with the highest charges includes two each from New England and Pennsylvania, one each from New York and Wisconsin, and four from California.

Tables 9 and 10 on pages 12 and 13 list the ten campuses with the highest and lowest charges for tuition and required fees and the highest and lowest total charges.

MEDIAN TUITION RISES OUTSTRIP RISE IN HIGHER EDUCATION PRICE INDEX

The NASULGC Office of Research and Information has surveyed its member institutions regarding tuition and fees every year since 1965. From 1965-66 until 1978-79, median tuition and fee charges for resident undergraduates have risen from $311 to $708, an increase of 127.7 percent.

The median tuition increase for non-resident undergraduates has moved up from $734 in 1965-66 to $1,733 in 1978-79, an increase of 136.1 percent.

These increases have outstripped the rise in the Higher Education Price Index, developed by D. Kent Halstead of the National Institute of Education. Over the same period, from 1965 to 1978, the prices that colleges and universities pay for goods and services rose 122.4 percent. This indicates that state universities and land-grant colleges have had to look increasingly to tuition and fees for revenue, as the real income from other sources has been depleted by inflation.

Table 6 shows median charges for undergraduate tuition and required fees since 1965-66 and the percentage and dollar increases for each academic year. The number of respondents supplying data for Table 7 varies from year to year and therefore the respondents are not a directly comparable group of campuses.

TOTAL UNDERGRADUATE COSTS KEEP PACE WITH HIGHER EDUCATION PRICE INDEX

Since 1969-70, when NASULGC first began to monitor total undergraduate costs, increases in total costs for resident undergraduates have risen less than the Higher Education Price Index for the same nine-year period. Total costs for non-resident undergraduates have risen at about the same rate as the Higher Education Price Index.

From 1969-70 to 1978-79, median total charges for resident undergraduates have moved from $1,297 to $2,221, a jump of 71.2 percent. Median total costs for non-resident undergraduates rose from $1,910 in 1969-70 to $3,406 in 1978-79, an increase of 78.3 percent. During the same period, higher education costs rose 77.8 percent, according to Halstead's index.

Table 8 shows medians for total undergraduate charges for each year since 1969-70 and the percentage and dollar increases for each academic year. The number of respondents supplying data for Table 8 varies from year to year, and therefore the respondents are not a directly comparable group of campuses.
